# Konosuke Matsushita

## founder of PHP Institute and Panasonic Corporation

Even now, 25 years after his passing, the name Konosuke Matsushita is still spoken with reverence in Japan. He is widely viewed as “the god of management” and remains one of the most influential and inspirational business thinkers ever. Founder and father of the global corporation Panasonic, as well as PHP Institute, Matsushita saw the creation of wealth not as a goal or destination but as a voyage.

Until his death at the age of 94 in 1989, Matsushita maintained a keen interest not only in his global industrial empire but also in humanitarian projects.

His philosophy of corporate management is highly idealistic as well as pragmatic and is infused with a fervent sense of mission. Always people-centered, it is grounded in his down-to-earth, realistic understanding of human nature.
